

## InvestorPOS Acquires VAULT Solutions and Strengthens its Financial Services Focus

**Toronto, ON, November 6, 2013:** InvestorPOS today announced that it has acquired VAULT Solutions Inc., a 10-year old professional services company with expertise in the development of Internet-based solutions for the financial services industry. VAULT has been in business since 2003, assembled from members of the same team that had developed and marketed The Fund Library ([www.fundlibrary.com](http://www.fundlibrary.com)) in 1995 and had earned a reputation for developing strategic web solutions in the wealth management industry for many of Canada's top mutual fund companies and dealers. This move will bolster InvestorPOS' technology capabilities supporting its document publishing and delivery solutions for the financial services industry, while benefitting VAULT Solutions' financial services clients with InvestorPOS' depth in multi-channel investor communications.

Anthony Boright, President and co-founder of InvestorPOS and founder of VAULT Solutions said, "InvestorPOS is well-positioned to assist financial services and insurance firms with the increasing regulatory disclosure requirements in the industry and this move will allow us to focus more on what matters to our clients. I started VAULT in 2003 and have enjoyed working with our financial clients, some of whom helped inform our initial business concept and products for InvestorPOS. By re-aligning our focus, InvestorPOS will be better positioned to serve the growing investor communications needs of its clients. We also look forward to providing VAULT clients an expanded service offering."

### About InvestorPOS

InvestorPOS Inc. is an investor communication solutions firm established in 2010 to address the evolving disclosure and compliance needs of asset managers and investment dealers. Recognizing the increasing disclosure needs of independent and bank-owned asset managers, large and small IIROC and MFDA dealers, and advisors serving investors, InvestorPOS has developed an innovative suite of hosted, software-as-a-service solutions to address the document composition, delivery, compliance and reporting needs of the financial services and insurance industries. Its flagship products include:

- **InvestorPOS Publisher™** - a robust publishing platform to help companies cost-effectively automate the document composition and management process. It is a hosted, cloud-based solution available online on a 24/7 basis that allows asset managers to leverage a common data strategy and platform for Fund Facts, Prospectuses, MRFPs, Financial Statements, Top 25 Holdings, Marketing Fund Profiles and other structured documents.

- ***InvestorPOS FFXpress™*** - The industry repository for dealers and their financial advisors to search the universe of Fund Facts and deliver them electronically or printed and mailed to their investors in a simple, secure and compliant manner. FFXpress™ accommodates dealers' front-office and back-office compliance needs and addresses Stages 2 and 3 of the Point of Sale regulation (National Instrument 81-101).
