JANUARY 4, 2017 – TORONTO, ON

InvestorCOM  
has a Waste  
Diversion Rate of  
**97%**

---

At InvestorCOM we are a responsible leader in environmental stewardship through our internal operations and by influencing and facilitating responsible communication practices for our clients.

This is the Vision Statement for the InvestorCOM Sustainability Committee, and in order to be a leader and facilitate environmentally sustainable changes externally, we truly believe that we have to set an example and ensure our internal practices are operating at an optimal level.

On October 6, 2016, Wasteco ([www.wastecogroup.com](http://www.wastecogroup.com)) completed a waste audit for the InvestorCOM Brantford office. Based on the data collected from the audit, the diversion rate (percentage of waste materials diverted from landfill) for our Brantford office is 97%. As the optimal diversion rate is 100%, the Brantford office is operating at an excellent level for diverting waste.

The audit was completed by collecting all of the waste and recycling from the various areas throughout the building; the warehouse, the office & bathroom, the office and the lunch room from that day. Once collected, the waste contents was weighed, analyzed and sorted.

Although a waste diversion rate of 97% is an excellent result, InvestorCOM always strives for improvement and we will continue to try and improve this result by continuing to develop our sustainability initiatives into the new year.

**About InvestorCOM Inc.**

InvestorCOM ([www.investorcom.com](http://www.investorcom.com)) is a leader in providing financial technology and outsourcing services to banks, asset managers, insurance companies and investment dealers. We have developed an innovative suite of FinTech solutions in response to increasing regulation and demand for more effective communication and disclosure from the financial services industry. Our solutions address the document composition, delivery, compliance, marketing, reporting and analytics needs of our clients.
